

PROTECTING AGAINST CORROSION

Converting waste into energy by combustion creates aggressive service environments with high temperatures, aggressive chemicals and abrasives.

CORROCOAT

Engineering expertise and application technology to ensure long-term corrosion protection.
WE CAN HELP TO PROTECT YOUR PLANT.

BOTTOM ASH

Ducting, silos and hopper coating.

PUMP REPAIR AND MONITORING

Dedicated, pump repair team, and the latest on-site thermodynamic pump testing.

TUBE BULLETING

Condenser tube cleaning services.

BAG HOUSE

Composite structural repairs to silos and specialist coatings eliminate metal replacement and prevents blockages.

SCRUBBERS

Specialist coatings prevent high temperature corrosion.

ECONOMISER

Economisers suffer problems especially at expansion joints creating cold spots.

WATERBOXES

Repair and reline services for water boxes.

FLUE GAS DUCTING

Ducting prone to corrosion throughout the plant.

ID FAN

Impeller coatings and dynamic balancing.

STACK

Issues occur with sulphuric and HCL acid condensation.

STRUCTURAL STEEL WORK

Structural steel work can be corrosion protected.
