

Road Tankers and ISO Tanks

Protecting Against Corrosion

CORROCOAT USA

PROTECTING AGAINST CORROSION

Road tankers and ISO tanks are used across all industries to safely transport liquids of all varieties from wines and beers through to chemicals and food ingredients. Corrocoat can prepare and corrosion protect tankers, both new and used, for a long service life in testing conditions on the road and railways.

NEWLY FABRICATED ROAD & ISO TANKS

Abrasive blasting to prepare tanks for coating
Specialist coatings protect against hazardous materials and chemicals when in service

CSR

Added strength and stability added to tanks using specialist laminates and fibre glass matting

SPECIALIST COATINGS TEAMS

Large blasting facilities at Leeds workshop
Specialist coatings teams using spray application

QUALITY

All coatings work tested for coating thickness to prescribed requirement
Full holiday testing to ensure continuity of coating and quality of finish

ALL INDUSTRIES

Fuel, LPG, food, chemicals, waste, drinks, dairy, grain and powders.....

REFURBISH; REPAIR AND RE-LINE

Road tankers and ISO tankers

INSPECT

NACE qualified inspectors advise on scope of works required

REPAIR

Removal of damaged and failed linings
Preparation of surface by abrasive blasting
CSR repairs and strengthening

RELINING

Full relining using specialist anti corrosion protective coating systems
Coating manways, baffles and baffle plates

QUALITY ASSURED

Thickness and holiday testing ensure continuity of final coating

ROAD AND RAIL TANKERS

ISO whether used on the road or rail network
