

PROTECTING AGAINST CORROSION

Mining companies everywhere suffer from corrosion problems. Recently, our expertise has taken us to deliver projects around the world. From continent to continent, we offer our skills, techniques and experience. Our 40 years' experience has seen us working in gold mining, as well as nickel, uranium, iron ore, tin and many more. Much of the equipment protected is still working well, even after 25 years' service.

Whether it's surface or sub-surface, we provide solutions that get results.

T: 904-268-4000

W: corrocoatusa.com

Our products are perfect for withstanding harsh operating environments. Our unique high-performance composites and coatings not only fight against corrosion, they also prolong the life of metals and machinery.

CLARIFIERS AND THICKENERS

Expertise in the management of coating programmes for settling tanks and vessels which handle solids.

PIPEWORK

Corrocoat specializes in the internal and external lining of pipe spools of different lengths, nominal bore sizes and dimensions.

VALVES AND PUMPS

Repair and refurbishment of pumps, valves and ancillary components of all shapes and sizes.

CONCRETE PROTECTION AND VARIOUS OTHER AREAS

Solutions are available for restoration, including crack injection, re-bar protection and replacement polymers.
